

Custom Peptide Synthesis

Crude peptide is delivered in 3 business day, and purified peptide in 5 business day at fastest. No additional express fees.

Product Line

~6 residue / 1 bottle

Purity	Yield (/mg)	~6 residue Fee(/Bottle)
Crude	5~50	¥25,000
80%	5	¥38,000
	10	¥42,000
	20	¥72,000
	30	¥85,000
90%	5	¥49,000
	10	¥59,000
	20	¥81,000
	30	¥93,000
95%	5	¥55,000
	10	¥63,000
	20	¥94,000
	30	¥102,000

* These prices above does not include VAT.

7~10 residue / 1 bottle

Purity	Yield(/mg)	7~10 residue Fee(/本)
Crude	5~50	¥25,000
80%	5	¥45,000
	10	¥50,000
	20	¥85,000
	30	¥100,000
90%	5	¥58,000
	10	¥70,000
	20	¥96,000
	30	¥110,000
95%	5	¥65,000
	10	¥75,000
	20	¥110,000
	30	¥120,000

* These prices above does not include VAT.

11~29 residue Fee / 1 residue

Purity	Yield(/mg)	11~29 residue (/ 1 residue)
Purity	5~50	¥3,000
80%	5	¥4,600
	10	¥5,200
	20	¥8,500
	30	¥10,000
90%	5	¥5,700
	10	¥6,800
	20	¥9,700
	30	¥11,500
95%	5	¥6,500
	10	¥7,700
	20	¥10,500
	30	¥12,000

* These prices above does not include VAT.

> 30 residues

Please ask us. (Email: info@bexnet.co.jp, <http://www.bexnet.co.jp>)

Large Scale Peptide

g unit – kg unit is acceptable.

Please ask us. (Email: info@bexnet.co.jp, <http://www.bexnet.co.jp>)

! Information !

The fee of < 11 residue is listed by 1 bottle. Otherwise, the fee of >10 residue is listed by 1 residue.

Calculation for 11~29 residue = Listed Price × Residues
e.g.) 80% 10mg 15 AA Peptide: ¥5,200 × 15 = ¥78,000

Custom Peptide Synthesis

Product Line

Modification • Specially Customized Peptide

	Examples of Modification
Fluorescence Modification	FITC, FAM, Rhodamine, etc.
Carrier Protein Conjugation	KLH, BSA, OVA, etc.
Special Amino Acid and Compounds	D-Amino Acid, Phosphorylated (Ser,Thr,Tyr) , Biotin, etc.
Peptide Modification	Intramolecular Disulfide bond

- * In the case of fluorescence modification to N end., aminocaproic acid (ACP, C6 Spacer) may squeeze between peptide and the fluorescence. Any other spacers are acceptable. Please ask.
- * In the case of fluorescence or biotin modification to C end, added to C end is Lys whose side chain combines with these modification. Any requests are acceptable. Please ask.
- * MBS Method is mainly used for carrier protein conjugation, which needs Cys in the end of the peptide. Any requests for the conjugation are acceptable. Please ask.
- * If any other modification is needed, please ask.

Special Offer Peptides (MOG, Loh15, PLP)

For the peptides listed below, we ship >95% purity products within three business days after receipt of order.

- ① MOG (Myelin oligodendrocyte protein) 35-55: MEVGWYRSPFSRVVHLYRNGK (21 residues)
- ② OVA (ovalbumin) 323-339 (Loh 15): ISQAVHAAHAEINEAGR (17 residues)
- ③ Myelin PLP(proteolipid protein) 139-151: HSLGKWLGHDPDKF (13 residues)

Delivery Date

Our staff contact after your order.

e.g.)

3 Business Days • • • Crude peptides

5 Business Days • • • Non-Modified Peptide : ~90% , ~20AA, ~10mg for the yield

10 Business Days • • • Modified Peptide : ~90%, ~20AA, ~10mg for the yield

* 0 business day is the order day. (Saturday, Sunday, holidays are not included in the business days)

* These delivery dates is at fastest.

Delivered Product

- Freeze-dried Peptide
- Data of certification of quality
- Mass spectrometry and HPLC data

How to Order

Please send your requests to us.

Please email or send the order form downloaded from BEX web page by email. (<http://www.bexnet.co.jp>)
Emails with the information of the sequence and any other data are acceptable. E-mail : info@bexnet.co.jp FAX : +81-3-5375-5636
